

The Simulator Advantage

At Ranchland Hills Golf Club, we have all the tools to help you develop your game. Our facility is the area's only indoor PGA Recognized facility, along with the most advanced golf simulator. Take your skills to a new level. Ranchland Hills Golf Club provides the ultimate indoor golf experience. The Full Swing Golf simulator combines the very best in software, ball tracking systems, image protection and touch screen control to present the most accurate simulation of the game available today.

You have the choice of practicing your game on the driving range, playing a round on any of the 14 famous courses or competing against your friends playing challenging games such as: Closest to the Hole, Longest Drive or Hole in One. Our practice simulator allows you to work on all areas of your game: approach shots, lob, uphill, downhill, bump and run, over trouble and more.

Complete customization of the golf course environment is allowed. This includes course and weather conditions, on-screen viewing options, and numerous modes of play. You can bring in and use your own golf clubs and balls as well as striking the ball as hard as you normally would on an outdoor course. All shots are played inside the simulator, from teeing off to putting. The multi-surface hitting area allows you to hit from a wide variety of simulated fairway, light rough, heavy rough, and sand surfaces. All shots are read accurately, including hooks, slices, topspin, and backspin. All of this combines to give you the ultimate real experience.

And of course, the best part is you can play or practice at any time because the weather is always perfect at Ranchland Hills Golf Club.

Indoor Golf Simulator

"We Know Golf Inside and Out"

Simulator Overview

1. THE USER INTERFACE

Easy to use menu-driven touch screen via a PC platform with the latest Intel chipset.

2. MULTI-SURFACE HITTING AREA

The Full Swing Golf Simulator allows players to hit from a wide variety of simulated fairway, light rough, heavy rough, and sand surfaces on any shot, without the limitations of a fixed hitting area.

3. THE TRACKING SYSTEM

Two 360-degree curtains of infrared beams, emitted at 60,000 pulses per sec., provide exact and immediate ball-flight statistics.

4. THE ENCLOSURE

Durable insulated panels form a complete indoor enclosure. Custom sizeable and fully adaptable to any interior design or fascia.
